

Abenezer Niguse

Software Engineer

kalkidan.777el@gmail.com · +251 96 173 2250 · Ethiopia
github.com/FrictionlessC0de · www.linkedin.com/in/abenezer-niguse

Summary

Software Engineer experienced in designing and building scalable SaaS platforms, real-time systems, and AI-powered applications. Strong background in backend development, API design, and system architecture, with hands-on experience in **TypeScript, JavaScript (Node.js), Python, and modern web technologies**. Delivered production systems for government institutions and built independent projects featuring AI integrations, rate limiting, and containerized deployments. Holds a B.S. in Software Engineering (CGPA 3.5/4.0) and a one-year ALX Africa backend certification. Seeking Software Engineer or Backend Engineer roles.

Experience

Full Stack Developer Intern · **Harari Regional State Innovation & Technology Agency (HinTA)** Aug 2025 – Nov 2025
Harar, Ethiopia

- Architected and delivered a full-featured SaaS agency website with a custom CMS using the MERN stack, enabling non-technical staff to manage and publish content independently — reducing manual update requests by an estimated 70%.
- Built and deployed web applications for government digital transformation initiatives across public institutions in the Harari region, contributing to 3+ active projects.
- Accelerated release cycles by integrating CI/CD pipelines via GitHub Actions; participated in sprint planning and peer code reviews in an agile team of 5 engineers.

Projects

Nimbus — AI Resume Analyzer & Builder [GitHub](#)

- Built a full-stack AI-powered SaaS platform that analyzes resumes against job descriptions and generates tailored, ATS-optimized resumes. Implemented rate limiting with Upstash Redis, PDF parsing and rendering, file storage via Vercel Blob, and secure authentication with NextAuth v5 and Prisma ORM.

Stack: Next.js 16, React 19, TypeScript, Anthropic AI SDK, Prisma, NeonDB (PostgreSQL), Upstash Redis, Vercel Blob, NextAuth v5, Tailwind CSS, Zustand, Zod

HinTA — Government Agency Website [GitHub](#)

- Developed the official website for the Harari Regional State Innovation & Technology Agency, featuring a multilingual interface (i18n), animated UI with Framer Motion, media management via Multer, and a secure admin CMS with JWT authentication and MongoDB.

Stack: React 19, React Router v7, Framer Motion, i18next, Zustand, Node.js, Express v5, MongoDB, Mongoose, JWT, Mailtrap, Multer

Personal Portfolio Website [Live](#)

- Designed and built a personal portfolio website featuring smooth scroll animations with Lenis, Motion-powered transitions, an AI assistant powered by Google Gemini, and a fully responsive layout — optimized for both recruiters and technical audiences.

Stack: React 19, Vite, Tailwind CSS v4, Motion, Lenis, Google Gemini AI SDK, Express.js, Lucide React

Madab Birr — C2C E-Commerce Platform — Group Project

- Co-developed a consumer-to-consumer e-commerce platform as a graduation group project, implementing product listings, shopping cart, order management, automated email notifications via Mailtrap, and Chappa payment gateway integration for local Ethiopian transactions.

Stack: MongoDB, Express.js, React, Node.js (MERN), JWT Auth, Mailtrap, Chappa Payment API

Skills

Languages: JavaScript, TypeScript, Python, Bash, SQL

Frontend: React, Next.js, React Router v7, HTML5, CSS3, Tailwind CSS, Redux, Redux Toolkit, Zustand, Framer Motion

Backend: Node.js, Express.js, REST APIs, WebSockets, JWT Authentication, Server-Side Rendering

Databases: MongoDB, PostgreSQL, MySQL, Supabase, NeonDB, Prisma ORM, Drizzle ORM

DevOps & Tools: Git, GitHub, Docker, Postman, GitHub Actions (CI/CD), Vercel, Upstash Redis, Vercel Blob

Concepts: SaaS, AI Integration, Agile / Scrum, Real-Time Systems, Rate Limiting, Clean Architecture

Education

B.S. Software Engineering

CGPA: 3.5 / 4.0

Haramaya University · Harar / Dire Dawa, Ethiopia · Sep 2021 – Jan 2026

Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Operating Systems, Computer Networks, OOP & Design Patterns, AI / Machine Learning, Web Development

Certifications

- ALX Africa — Full Stack Software Engineering** *(1-year program, Backend specialization)*
Curriculum: Python, Bash scripting, Data Structures & Algorithms, Networking, Frontend & Backend development, Git & version control — progressing from programming fundamentals to production-ready backend systems.

Languages

English (Professional) · Amharic (Native)
